

Jasmine Floyd

Senior Product Manager • AI Product Strategist • Agent Architect

jasmine.floyd@gmail.com • New York, NY • [Portfolio](#) • [LinkedIn](#)

Senior Product Manager with 10+ years of experience building and scaling B2B, B2C, SaaS, and mobile platforms, with a specialization in AI-powered products and multi-agent systems. Proven track record of owning product roadmaps, defining user stories, prioritizing backlogs, and leading cross-functional teams to deliver high-impact solutions. Expert in translating ambiguous business problems into product strategy, technical requirements, and shipped features.

Experienced in Agile/Scrum environments, stakeholder management, and end-to-end product lifecycle ownership from discovery through GA. Strong focus on AI product development, including agentic workflows, prompt design, evaluation frameworks, and scalable system architecture — balanced with a deep understanding of business impact (revenue, retention, efficiency).

EXPERIENCE

Popmenu

Senior Product Manager

Oct 2021 – Present · Growth-Stage SaaS

- Own the product roadmap and backlog for AI-driven onboarding, mobile applications, and consumer ordering platforms across a multi-product SaaS ecosystem
- Architected an AI-powered onboarding system (multi-agent workflow) reducing setup time from ~7 days to <24 hours (97% improvement), projected to drive ~\$250K incremental ARR per quarter and reduce onboarding costs by 40%
- Defined product requirements, user stories, and acceptance criteria for an AI Assistant that translates user goals into prioritized, validated actions using scoring models and behavioral guardrails
- Scaled mobile app adoption from <100 users to 72% of customers, improving retention and daily active usage through iterative feature development and UX improvements
- Led 0→1 development of a consumer ordering platform, including payments, ordering flows, and AI-powered review management features
- Partnered with Engineering, Design, CX, and Leadership to prioritize features, manage tradeoffs, and deliver releases in Agile sprints
- Built internal AI tools for support and CX workflows, reducing manual handling time and improving operational efficiency across teams

Upside Business Travel

Senior Product Manager

Jun 2020 – Aug 2021 · B2B Travel + Fintech

- Co-led product strategy and execution for a COVID-driven fintech pivot, delivering a PPP loan application and forgiveness product in under 8 weeks, extending company runway by 12+ months
- Owned roadmap planning, backlog prioritization, and stakeholder alignment across Product, Engineering, and executive leadership
- Led a 10-person cross-functional team to build a Partner Management Interface, enabling enterprise clients (e.g., Capital One) to self-serve configurations and reporting
- Defined and shipped secure API integrations supporting real-time data exchange between internal systems and external partner platforms
- Improved partner onboarding efficiency and reduced manual support through automation and self-service tooling.

Reliant Technology

Lead Product Manager

May 2017 – Mar 2020 · SaaS Pivot

- Joined as first PM hire and owned a full company pivot from hardware resale to SaaS — defined scope, built the roadmap, and shipped an asset tracking platform and vendor partner portal from 0 to GA, establishing the company's first recurring software revenue stream.
- Partnered with CEO and sales leadership to define and execute a business model shift from service-led to SaaS subscription revenue, directly informing investor narrative and pricing strategy during the transition.
- Built and scaled remote product delivery across Product, Design, and Engineering — established repeatable sprint cadences and scoping processes that enabled consistent quarterly releases across a fully distributed team.

AvePoint

Technical Account Manager → Senior Product Manager

Jan 2013 – May 2017 · Enterprise SaaS

- Promoted from Technical Account Manager into Product during the company's on-prem to SaaS transition, owning the waterfall-to-agile shift for a product org serving Fortune 500 enterprise customers.
- Owned product modules integrated with the Microsoft cloud ecosystem (Office 365, Azure, Microsoft Graph APIs), contributing to platform adoption growth during the company's strategic IPO phase.
- Served as cross-functional bridge between enterprise customers and engineering, translating complex compliance and data governance requirements into prioritized roadmap decisions across a multi-year engagement cycle.

ADDITIONAL EXPERIENCE

The Floyd Method

Founder & Author

2025 – Present

- Developed The Floyd Method, a structured AI framework for product managers to leverage AI for planning and shipping products.
- Authored the YSNT Vibe Coding Playbook and accompanying app, defining a 5-phase build lifecycle and reusable prompt patterns for production-ready AI systems.
- Serves as Builder Support Lead at SheBuilders x NYC, coaching founders and operators on moving from idea to shipped product using AI-native workflows.

CORE SKILLS

Product Management & Delivery

Product roadmap ownership • Backlog prioritization • User stories & acceptance criteria • Agile / Scrum • Stakeholder management • Product lifecycle management • GTM strategy • KPI definition & tracking

AI Product & Systems

AI product strategy • Multi-agent systems • Workflow orchestration • Prompt engineering • Evaluation frameworks • AI feature development • Human-in-the-loop systems

Technical & Tools

APIs • SQL • React • TypeScript • System design • Data analysis
Figma • Snowflake • Looker • Tableau • Fullstory • Amplitude
Vercel • Cursor • Claude • OpenAI • Perplexity

EDUCATION & CERTIFICATIONS

Johnson C. Smith University

B.S. Computer Science — Information Systems
